The Gourmet Entertainer

Kava contains kavalactones found mainly in the lateral roots and stem of the plant. Kava is used extensively in the Pacific for ceremonial purposes, for gentle social interaction, and for relief from stress and sleeplessness.

Vanuatu kava is renowned to have higher kavalactone values than from other regions of the Pacific.

The Ni-Vanuatu drink the kava from a cleaned coconut shell half, and a drink of Kava is accordingly known as a “Shell”.
